Venue and Accommodations
Our host venue, Gaylord Palms Resort and Convention Center, released their Health and Safety Protocols that provide in-depth details on how they facilitate a safe, secure, and healthy environment onsite for all participants, both in terms of the 2021 AWHONN Convention itself and accommodations. Please review their policies for hotel-specific precautions.

Keep Up with All Things Convention on AWHONN’s Social Media!
Do you want to stay up to date on all things Convention? Are you ready to start the Convention fun now? Social media is a great way to join in on the AWHONN Convention conversation.

Here are a few ways you can join in on the fun now:

- **Follow us on social media:** Follow us on all of the different platforms (Facebook, Instagram, Twitter, and LinkedIn) to network with your colleagues, stay up to date on the latest educational content, and be the first to know about any Convention updates!
- **Share that you’re attending:** Let your followers know that you’ll be joining us in Florida.
- **Use our hashtags:** Whenever you post about Convention, be sure to use #AWHONNConvention or #AWHONN2021 to join the virtual conversation.
- **Tag us:** In addition to using our hashtags, feel free to tag us (@AWHONN) in any Convention-related posts. We might even reshare it to our profile!

We’ll be sharing the Convention fun on social media so everyone can join in. Here are some ways you can share your experience online during the Convention:

- Post a picture with your friends and colleagues. Be aware that you may be featured in the background of others’ photos.
- Share what sessions you attend and tell us your favorites.
- Snap a picture of the best swag you get from the vendor booths and tag us.

GENERAL SESSION SPEAKERS

GS1 - OPENING GENERAL SESSION - EC
Rear Admiral Aisha Mix, MSN, MPH, RN
Join us for this kick-off session as we hear from Rear Admiral Aisha K. Mix, Chief Nurse Officer. With more than 20 years in nursing as a clinician, public health practitioner, educator, and emergency manager, Mix serves as the Senior Health Policy Administrator for the U.S. Department of Homeland Security, Immigration and Customs Enforcement Health Service Corps (IHSC) where she manages a team focused on the enhancement of health care delivery within IHSC facilities.

GS2 - BLACK MOTHERHOOD AND THE INVISIBLE BURDEN OF RACE, RACISM, AND IMPLICIT BIAS - EC
Jai-Me Potter Rutledge, BS, MHA, PhD(c)
This presentation will take audience members on a journey of Black motherhood and the role that race, racism, and implicit bias have on that journey. Through vignettes, improv, and interactive exercises, participants will actively engage with the material. The presentation is meant to be thought-provoking by allowing time for self-reflection and questions. In addition to the personal journey, participants will discuss relevant scientific research and how this increased knowledge will or has impacted their professional practice.

GS3 - HEALTH CARE ADVOCACY: GIVING A VOICE TO YOUR HEART - EC
William Leininger, MD, FACOG
Lauren Nunally, MPH, BSN, RNC-OB
Many nurses want to make health care improvements that need efforts beyond their consistently excellent bedside care. This session will first highlight why advocacy is so important for improving the health care system and why nurses already have the credibility and skills to effectively advocate and successfully impact purposeful change in their local communities, regions, and even state. Then, we share real-world engagement strategies that nurses can take to their home institutions for immediate implementation.

GS4 - LIFE IN BALANCE: IMPROVING THE QUALITY OF YOUR JOURNEY - EC
Marianne Neifert, MD, MTS, FAAP
This informative, entertaining, and inspiring session will address the universal quest of contemporary life—finding a balance. Dr. Mom will share timeless, practical life-strategies to equip nurses to achieve greater balance, promote resilience, and enhance life satisfaction by identifying governing values, aligning priorities, nurturing core relationships, recognizing faulty thinking, and increasing self-care. Come prepared to laugh and learn – leave rejuvenated and re-energized about your life and your work!
The Preconvention workshops are concurrent sessions held on Saturday and Sunday before the official opening of the Convention. There is an additional fee for these sessions, which includes a continental breakfast at morning workshops and beverages and snacks at the afternoon workshops.

SATURDAY, OCTOBER 9

7:30 am–5 pm

PC2 - Introduction to Point of Care Ultrasound in the Obstetric Care Setting

The AWHONN Introduction to Ultrasound Course is a program based on the AWHONN Ultrasound Examinations Performed by Registered Nurses in Obstetric, Gynecologic, and Reproductive Medicine Settings: Clinical Competencies and Education Guide (4th ed.). The course offers a novel educational approach for nurses who provide ultrasound services based upon their state boards of nursing regulations. This eight-hour course provides the educational content, demonstration, and hands-on practice to successfully begin training and achieve competence in respective facilities.

Kim Armour, PhD, NP-BC, APRN, RDMS, NEA-BC

8 am–12 pm

(3.75 CH)

PC3 - Hands-on Labor Support - EC

The purpose of this program is to provide education about the different forms of support during pregnancy and childbirth, including hands-on techniques, alternative therapies, coping strategies, and respectful maternity care.

Patricia Klassa, MSN, RN, CNS-C, IBCLC
Cheryl Larry-Osman, DNP, MS, RN, CNM, CNS-C

1–5 pm

(3.75 CH)

PC4 - Assess & Address the “Failure to Progress” - EC

In this four-hour exploration, we reintroduce the labor and delivery nurse to the birthing pelvis. For fresh solutions for pain in labor, posterior labors, and labor dystocia, we ask a new question, “Where is baby?” We believe baby’s position reflects the anatomical space available. For sensible solutions, we connect pelvic station with fetal presentation and open that pelvic diameter with a matching birth position. Suddenly, the way we’ve been aiding progress turns on its head. We soon realize fetal positioning is only a clue of what is needed and perhaps not the originating cause of a long and complicated labor. Bring birth back to ease.

Gail Tully, BS, CPM, CD
Rhea Williams, PhD(c), CNM

8 am–5 pm

(8.0 CH)

PC1 - Birth of a Lawsuit: A Preconference Workshop on Perinatal Care and the Law - EC

Labor, birth, and subsequent neonatal care are complex processes that require a collaborative team that is focused on evidence-based principles of care. Regrettably, not all outcomes are good, and litigation is likely whenever a mother or infant is injured. This all-day workshop is your opportunity to develop a better understanding of lessons learned by the trial attorneys who litigate these challenging cases. Discussions will include preventable maternal death, obstetrics in the emergency department, oxytocin liability and electronic fetal monitoring, informed consent, deposition strategy and psychology, charting issues, and common allegations.

Stephen R. Brzezinski, JD
Adam Synder, JD

8 am–12 pm

(3.75 CH)

PC5 - Do the Drills. Skip the Drama! - EC

When we talk about drills, many team members get anxious and try their best to avoid getting pulled into one (maybe even resorting to hiding out in the soiled utility room). Compounding the problem, many educators and leaders do not feel confident in planning and conducting drills or defending the benefit of them to their teams. This presentation will prepare you to implement the new Joint Commission drill requirements in accordance with simulation best practices, review the evidence surrounding the benefits of team drills, and arm you with techniques to engage your team, decrease anxiety, and skip the drama!

Cathy Jones, MSN, RNC-OB, C-EFM
Nicole Lescota, DNP, RNC-OB, C-EFM
SUNDAY, OCTOBER 10

8 am–12 pm

(3.75 CH)
**PC6 - Fetal Monitoring: From Delivery Decisions to Deposition Survival, We’ve Got You Covered! - EC**
Join experts (and coauthors) Dr. David Miller and Lisa Miller for a session on fetal monitoring that will address an evidence-based approach to delivery decisions with persistent Category II tracings, provide deposition survival strategies, and explore current thoughts on oxygen supplementation. Group tracing review and an interactive quiz will help participants assess their own knowledge as well as learn to work with others on a shared mental model in tracing interpretation. Bring your questions and be ready for lively discussion and a truly interactive preconvention.

**PC8 - Is This Infant at Risk for Developing Hypoxic-Ischemic Encephalopathy (HIE)? Optimizing Antepartum, Intrapartum, and Delivery Room Care - EC**
Description coming soon.

*Yova Nicolau, MD*

Your AWHONN President, Cyndy Krening, MS, CNS, RNC-OB, C-EFM, invites you to acknowledge, embrace, and celebrate your experiences over the last year, and prepare for an amazing future. Join us for an evening of fun and be prepared to unveil your identity as the superheroes you are! Superhero attire is encouraged but not required.
