

E Concurrent Sessions

Monday, June 10

3-4:30 pm

E1 - Stigmatizing Language in Obstetric Care: Research and Recommendations for Change

Interest Areas:

- Implicit Bias
- Reproductive Health & Justice
- Respectful Maternity Care

Stigmatizing language has been associated with poorer quality of care, especially for people racialized as Black or Latinx. We will present our completed research identifying stigmatizing language in the electronic health records of birthing people. We will also provide a model for conceptualizing how stigmatizing language is used, describe clinical implications, and recommendations for change.

Speakers: **Veronica Barcelona, PhD, MSN, RN, PHNA-BC**, Columbia University School of Nursing, New York, NY and **Rose Horton, MSM, RNC-OB, NEA-BC, FAAN**, Emory Decatur Hospital, Decatur, GA

E2 - Nursing Education: Innovative Strategies for Strengthening Orientation

Interest Areas:

- Professional Development
- Diversity, Equity, Inclusion, Justice & Belonging
- Nursing Orientation Resources

The educator is responsible for applying principles, theories & best practices of teaching & learning in the development of perinatal nurses throughout orientation, ongoing education, and competency development. Evidence-based practices in education can improve health care and impact patient outcomes. This session will describe innovative strategies to strengthen perinatal nurse orientation.

Speakers: **Nanette Vogel, MS, RNC-OB, C-EFM, NPD-BC**, Birthplace, University of Minnesota Masonic Children's Hospital, Minneapolis, MN and **Rhianna Britton, MSN, RNC-OB, C-EFM, NPD-BC**, Practice and Education, M Health Fairview, Maplewood, MN

E3 - Initial Obstetric Evaluation Clinical Pathway: A Multi-Facility System Playbook

Interest Areas:

- Patient Safety
- Policies/Procedures
- Triage
- Nursing Orientation Resources

After an increase in events highlighting opportunities in OB Triage and initial assessment of the pregnant patient, a multifacility hospital system developed a task force to create a standardized evidence-based care (EBC) clinical pathway. This presentation will share discoveries and implemented solutions including OB EMTALA requirements, validation of nurse competency to EBC, and approach to new graduate and new to OB RN's.

Speakers: **Jill Hughes, MSN, RN, RNC-OB**, Clinical Programs, INTEGRIS Health, Oklahoma city, OK, **Denese Campbell, MSN, RN C-EFM**, Women & Children, House Supervisors, & Float Pool, INTEGRIS Bass Baptist Health Center, Enid, OK and **Janae Baldwin, BSN, RN, C-EFM**, Department of Nursing Education, INTEGRIS Health, Oklahoma city, OK

E4 - Facilitating Culturally Safe Conversations Around Substance Use and Contraception

Interest Areas:

- Patient Safety
- Implicit Bias
- Communication
- Diversity, Equity, Inclusion, Justice & Belonging

Conversations with patients about alcohol/substance use and contraception choices can be challenging. Creating an environment of cultural safety is imperative to establish trust. With evidence-based skill training, nurses can integrate cultural safety principles into patient-centered communication and strengthen their skills and confidence to effectively address sensitive topics to improve outcomes.

Speakers: Faith Green, Masters in Public Health (health education and health communication), plain language communication certified, BA Medical Anthropology, Center for Behavioral Health Research - Women's Health Nursing Care and Prevention Project, University of Alaska, ANCHORAGE, AK and **Lily Bastian, CNM**, Office, Minneapolis, MN

E5 - Amniotic Fluid Embolism: Recognition, Management, and Patient Centered Care

Interest Areas:

- Birth Trauma
- Labor Issues (e.g., preterm labor, labor dystocia, etc.)
- Simulation
- Trauma-Informed Care

A comprehensive discussion of amniotic fluid embolism including general understanding, recognition, management, and the importance of simulation. Followed by a patient's perspective, the effects of vicarious trauma on clinicians, current research opportunities, and how to access available tools and resources.

Speakers: Suzanne Baird, DNP, RN, Clinical Concepts in Obstetrics, LLC, Brentwood, TN, **Jamie Agunoday, MA, MSN, RNC-OB**, Central Jersey Family Health Consortium, North Brunswick, NJ and **Miranda Klassen, BS, Biology**, AFE Foundation, Vista, CA

E6 - Born Too Soon: Clinical Updates and Future Directions in Preterm Labor and Birth

Interest Areas:

- Antepartum Care/Issues
- Labor Issues (e.g., preterm labor, labor dystocia, etc.)
- Neonatal Morbidity & Mortality
- Fetal Heart Monitoring

The high incidence of preterm labor and birth remains relatively unchanged despite intensive research efforts and advances in obstetric care. Nurses play a significant role in identifying, supporting, and managing patients in an antepartum and intrapartum setting. This session will highlight clinical strategies, current science supporting contemporary guidelines, fetal monitoring, and nursing responsibilities in caring for this high-risk population.

Speaker: Rebecca Cypher, MSN, PNNP, Cypher Maternal-Fetal Solutions, LLC, Gig Harbor, WA
